COBALT IN DECEMBER 2004

On the basis of preliminary data, U.S. cobalt consumption during 2004 was slightly higher than consumption during 2003, according to the U.S. Geological Survey. U.S. cobalt consumption during the quarter ending December 31, 2004, was nearly equal in amount to consumption during the quarter ending September 30, 2004.

The amount of cobalt contained in U.S. imports of cobalt metals and chemicals was 5% higher during January through November 2004 than that of imports during the same period in 2003. The amount of cobalt contained in U.S. exports of unwrought cobalt and chemicals was basically the same during January through November 2004 as that of exports during the same period in 2003. Trade data for December 2004 will be available in a subsequent issue.
